ÖNSÖZ

1906-1912 yılları arasında Boğazköy'de, Deutsche Orient Gesellschaft adına Theodor Makridi ve Hugo Winckler tarafından yapılan kazılarda onbin civarında tablet bulunmuştu. Bulunan bu tabletler, o zamanların tek müzesi olan İstanbul Arkeoloji Müzeleri'ne gönderilmiştir. Kazıdan çıktıkları andan itibaren de konularına göre gruplandırılmadan Bo. 1'den başlayarak envanter numaraları verilmiş, bu nedenle tabletler koleksiyonun içinde konularına göre numaralandırılmamışlardır.

Tabletlerin İstanbul Arkeoloji Müzeleri'ne gönderildikleri tarihlerde, bu müzede bir konservasyon laboratuvarının olmaması ve tabletlerin bir konservasyon işlemine ihtiyaç duymaları nedeni ile sonradan geriye verilmek üzere, bugün hâlâ adedini tam olarak bilemediğimiz fakat 10 400 civarında tahmin ettiğimiz tablet resmî makamların izni ile Berlin'e gönderilmiştir.

Konservasyon işlemleri çeşitli nedenlerle uzun bir zaman almış ve ancak 1939 yılında 7 ve 1942 yılında 2 parti halinde olmak üzere toplam 2943 tablet İstanbul Arkeoloji Müzeleri'ne geri gönderilmiştir.

Daha sonraları İkinci Dünya Savaşı'nın araya girmesi ve savaş sonunda tabletlerin Doğu Berlin'de kalması ve yakın zamanlara kadar Doğu Almanya ile diplomatik ilişkilerin bulunmaması nedeni ile yaklaşık 7400 civarında tablet İstanbul'a gönderilememiştir. Son zamanlarda tabletlerin geriye gönderilmesi konusunda yetkili makamlar Doğu Almanya ile ilişki kurmuşlardır. Ümit ederiz ki, tamamı İstanbul Arkeoloji Müzeleri'ne ait olan Boğazköy koleksiyonunun Doğu Berlin'de kalan bu kısmı da müzeye gelerek koleksiyon tamamlanmış olur.

Boğazköy tabletlerinin yayınına 1921 yılında Keilschrifturkunden aus Boghazköi I (= KUB) ve 1923 yılında da Keilschrifttexte aus Boghazköi I (= KBo) serileri ile başlanmış ve bu seriler günümüzde de devam etmektedir.

1942 yılında Doğu Berlin'den gönderilen son parti ile birlikte 2943 tablettten oluşan İstanbul Arkeoloji Müzeleri'ndeki Boğazköy koleksiyonunda 723 tablet yayınlanmamıştı. O yıllarda müzede görevli olan çivi yazıları uzmanları Muazzez Çığ ve Hatice Kızılay (Bozkurt), ile yine o yıllarda Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi'nde öğretim üyesi olan Prof. Dr. H.G. Güterbock bu tabletlerden 323 adedini üç cilt halinde "İstanbul Arkeoloji Müzelerinde Bulunan Boğazköy Tabletleri" (= IBoT) adı altında 1944, 1947 ve 1954 yıllarında yayınlamışlardı. Geriye kalan 400 tablet de küçük ve daha önemsiz görüldüklerinden yayınlanmamışlardı.

1970 yılında, o zamanlar İstanbul Arkeoloji Müzeleri Çivi yazılı Belgeler Arşivi şefi olan çivi yazıları uzmanı Sayın Muazzez Çığ, bu tabletler üzerinde çalışmak ve kopyalarını yaparak bir yayın halinde hazırlamak için beni teşvik etmişti. O tarihten bu yana 8 yıllık bir zamanı kapsayan bu çalışma sonucu, 344 adedi kopya ve 56 adedi de envanter halinde olan toplam 400 tablet bu cildi oluşturmuştur.

Bu tabletler üzerinde çalıştığım sıralarda Prof. Dr. E. Laroche, Bo. 2790'ın önyüzünün KUB x 45'te kopya edilmediğine değinerek bu kopyanın da tarafımdan yapılarak bu cilde konmasının uygun olacağını belirtmişti. Böylece sözü edilen tablet 345 numara altında kopya edildi.

Aynı şekilde Bo. 2984 + 3414 de transkripsiyon halinde BoTU 31'de yayınlanmıştı. Bo. 3414, KUB XIV 23'te kopya olarak yayınlandığı halde Bo. 2984'ün kopya olarak hiçbir yerde yayınlanmadığı tarafımdan farkedildi. Bu ciltte her ikisin birlikte 346 numara altında kopya ettik.

Kopyaların yapımını tamamladığım 1978 yılında, Chicago Oriental Institute adına yürütülen Hittite Dictionary Project direktörlerinden Prof. Dr. Harry A. Hoffner Jr., İstanbul Arkeoloji Müzeleri Çivi yazılı Belgeler Arşivi'nde bulunan yayınlanmış bazı Boğazköy tabletlerinin kollasyonunu yapmak amacı ile İstanbul'a geldi. Hittit tabletlerinin bütün dokümanlarına sahip olan bir kurumun mensubu ve projenin sorumlularından biri olması nedeni ile oldukça küçük parçalardan meydana gelen bu metinlerden bazılarının teşhisi hakkında kendisinin bilgisine başvuruldu. Bazı ortak çalışmalar sonucu, metinlerin konularının saptanması, varsa

joinlerinin bulunması için Prof. Dr. H.A. Hoffner'in, bu cildin katalog kısmını hazırlamasının daha yararlı olacağı kanısına varıldı. Böylece metinlerin katalog kısmı ve dizinler kendisi tarafından yapılmış oldu.

Bu ciltte bulunan tabletlerin transkripsiyon ve kopyalarını yapmaya beni teşvik eden ve bu konuda her türlü yardımlarını esirgemeyen İstanbul Arkeoloji Müzeleri'nden emekli çivi yazı uzmanı Sayın Muazzez Çığ'a ve çeşitli konularda bilgisinden yararlandığım İstanbul Üniversitesi Edebiyat Fakültesi öğretim üyelerinden Sayın Doç. Dr. Ali M. Dinçol'a burada teşekkür etmeyi zevkli bir görev sayıyorum.

FOREWORD

Between the years 1906-1912 approximately ten thousand tablets were discovered in the excavations carried out by Theodor Makridi and Hugo Winckler on behalf of the Deutsche Orient Gesellschaft at Boğazköy. These tablets were sent to the Istanbul Archaeological Museums (the only museums that existed at that time). From the moment they were excavated and without being grouped according to subject, they were given inventory numbers beginning with Bo. 1. For these reason, in the collection are not numbered according to subjects.

When the tablets were sent to Istanbul Archaeological Museums there was no conservation lab in this museum, but because the tablets were in need of conservation treatment they were sent to Berlin by permission of the official authorities on condition that they be returned later. Although we are still unable to ascertain the exact number of tablets, they are estimated to be about 10400.

For various reasons the conservation procedures took a long time and finally in 1939 and in 1942 a total of 2943 tablets were returned to Istanbul Archaeological Museums (7 installments came in 1939 and 2 instalments came in 1942).

Later, because of the intervention of the Second World War and because some of the tablets are in present-day East Germany, and due to the lack of diplomatic relations with the East Germany, approximately 7400 tablets have unfortunately not been returned to Istanbul. Recently authorities have established relations with East Germany regarding the return of the tablets. We hope that this part of the Boğazköy collection in East Berlin will be returned and that the collection will be completed, in as much as the total collection belongs to the Istanbul Archaeological Museums.

Publication of the Boğazköy tablets began in 1921 with the series "Keilschrifturkunden aus Boghazköi" I (= KUB) and in 1923 with the series "Keilschrifttexte aus Boghazköi" I (= KBo). These two series are still continuing.

The return of the last tablets in 1942 from East Berlin brought the total number of tablets in the Boğazköy collection in the Istanbul Archaeological Museums to 2943. At that time 723 of these had not been published. 323 of these tablets published in 1944, 1947 and 1954 in three volumes entitled "İstanbul Arkeoloji Müzelerinde Bulunan Boğazköy Tabletleri" (= IBoT) by Muazzez Çiğ and Hatice Kızılyay (Bozkurt), cuneiform scholars working in the Istanbul Archaeological Museums at that time in those years and Dr. H.G. Güterbock, Professor of Hittitology in the Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi. The remaining 400 tablets were not published at that time because they were small and considered less important.

In 1970, the cuneiform scholar Muazzez Çiğ, at that time head of the Cuneiform Tablet Archives of the Istanbul Archaeological Museums, encouraged that I study these tablets, copy them and prepare them for publication. This volume the result of an 8-years study, contains 400 tablets: 344 copies and an inventory of 56.

While I was working on these tablets, Prof. Dr. E. Laroche noted that a copy of the obverse of Bo. 2790 had not been made in KUB x 45 and pointed out that it would be appropriate for me to make copy and include it in this volume. In this way this tablet was copied under No. 345.

Similarly, Bo. 2984 + 3414 was published in transliteration in BoTU 31. Bo. 3414 of this tablet was published as a copy in KUB XIV 23. Bo. 2984, however, was never published as a copy. In this volume I am now publishing a copy of these two pieces under No. 346.

In the summer of 1978 when I completed the copies, Prof. Dr. Harry A. Hoffner Jr., one of the directors of the Hittite Dictionary Project, which was carried out on behalf of the Chicago Oriental Institute, came to Istanbul to make a collation of some published Boğazköy tablets found in the Cuneiform Tablet Archives of Istanbul Archaeological Museums. I asked Prof. Dr. Hoffner about the identification of some of the texts consisting of rather

small fragment, since he was a member of a foundation in possession of all Hittite tablet documents and was one of those responsible for the project. As a result of our collaboration, we agreed that it would be more useful for Prof. Dr. Hoffner to compile a catalogue to establish the subject of the texts and if they exist, to find parts that can be joined. Thus, the catalogue and indices of the texts were compiled by him.

It is my pleasant duty to thank Muazzez Çiğ, retired cuneiform scholar from Istanbul Archaeological Museums, who encouraged that I make transliterations and copies of these tablets in this volume and helped me unsparingly in every way. My thanks are also due to Doç. Dr. Ali M. Dinçol of the İstanbul Üniversitesi Edebiyat Fakültesi, whose knowledge on many subjects was of great help to me.
